So I got a small idea- How about making an increased PT limit, and anything that goes past the current size, is like a second page? Or have a scroll wheel of sorts.
That might be a good idea if you wanted to buy a unit really quick, but it would be easier to know which class is which by using different section like: Vehicles, Aircraft, Light Infantry, Medium Infantry, Heavy Infantry. You may not like this idea, but it's just a suggestion.
