TD wrote on Wed, 13 August 2008 03:55 Well, I guess instead of adding outside PT's, they should be disabled. I've thought about the fixes again and I guess Karma is making good points up there. I change my decision, fix the glitches, create new tactics. I'm actually kinda bored of the same tactics anyway. I might even approve pointsfix to see how people make up new tactics because of the changes

I hope to see this patch anytime soon, with all the glitches fixed, but especially with an anti-cheat system that will be maintained as long as Renegade is alive.

Go for it TT

Now, only if many others would think the same way...
