NEW!

This mod replaces the C-130 with a Submarine! Few problems with it, but untill I update it, LIVE WITH IT, or post a way to fix them....

PIC:

Glitches/BUGS:

Sub flies sideways.

Sub doesnt drop off cargo, but has the cargo spawn at the air strip tell it passes by, then the cargo moves.

The second the sub "drops" off the cargo, the top hatch flies open and rotates in a propeller like fassion.

Sub is not civ, like C-130 (c-130 hase a 0 with a line through it, while sub has a nod symble).

-Install like all others, in data folder.
