Hi,

LoL, I just noticed this post wasnt started by him, but just a posting about his server. Wow. Anyways, I did not mean I wanted to copy it, just host it for him. I even stated in my post that I would assure it would not be leaked out and he/they would have full rights over the server as they do now. No one has access to my servers but me and one other guy and he never gets on. I've hosted for years and know files are on whoever hosts the game or an FDS. I was just "requesting" to host for him for "FREE"....on a legitimate server with dual cpus enough ram and more than enough bandwidth so the only problems should be caused by game code.

Like I also stated, my kid is the one that plays in there. So I'm never in game to ask, when I asked my kid to do it...it resulted in a T-Ban.

If you guys think it is better to ask in game, then I guess I'll have to give it a visit.

Thanks for your responses...and anything else that can help me find him would be much appreciated.
Good luck with that, but I may warn you, W4RNING is typically a bit cranky 99/100ths of the time.
