Crimson wrote on Fri, 09 March 2007 02:25I just got one of these since I stupidly (and of course accidentally) poured a few ounces of Pepsi into my old Logitech cordless keyboard.

I'm TOTALLY loving the neat TeamSpeak 2 plugin for it, but I'm wondering if there's any interest in a Renegade one. The keyboard comes with an SDK to write your own apps for it. I'm sure I don't have the talent necessary to write anything, but I'd love to hook up with someone or someones to make it happen.

So, let me know if you have one of these keyboards or if you'd like to help with a program for it. sure
