danpaul88 wrote on Tue, 28 October 2008 15:22Set your skin on the mp-gaming forums to the APB skin like I do, makes the forums load much faster compared to the graphics heavy skins like the CnC3 one.

Just think what would make that worse is if MP had anti-cache meta tags to their <head>ers XD
Thus making all those CnC3 skin images load each time you navigate XD
