You can do without V too, but then you get strafe shots, where you strafe and shoot when the enemy passes your crosshair.

I tend to jump when I snipe, dunno why, think it has to due with me doing it too with Call of Duty 2, with the K98ZF.

Love the quick scoping in CoD2. If you enjoy Renegade sniping, you might enjoy the sniping in CoD2 too, and the rifle (only) things

PS: DrasticDR, you really Gonzalez? Cool
