---

Is anyone here using "Virtual Drive" -program? I used it to create a virtual drive for me and now I have a Cd-Rom drive "E". How can I delete this "E"- drive? There is nothing in it and it has no size, its just an empty virtual drive...I haven't found any way to delete it...

Info of VDrive <http://www.farstone.com/home/en/shtml/vdpoverview.shtml>

To clear it out, I now have A-drive for floppies, C for HD, D for Cd-rom and E for the virtual Cd-rom, which actually isn't a CD-Rom, the system just thinks it is.
