ok, this is JUST like the atl4ntis server, almost everything macthes up, did you either buy it from w4rning, u r w4rning, or did u seriosly make this urself? The "Jail" i have only seen on atl4ntis, the actuall pic above (in quote) i have only seen in atl4ntis, in fact, thats atl4ntis's main building for cnc_islands and M03 (i think it's 3, it's the lvl with valcano, and is one big island with the sub...).

An other thing thing that makes me think this is atl4ntis, is that:

is Atl4ntis's STARGATE! w4rning made that exact, let me empisize:

[SIZE=7]EXACT![/SIZE]

desine. What are you asking? I might of type more than i had to if ur just asking what happened to it, lol.
