My internet browser was tring to open ALL the pic from ALL the links at once, and was lagging up the proces sop bad, i could only see the tips of the first few pic, even if i closed the spoiler, my browser was tring to open it. BTW: what does this mean?

(what does that command do?) you can enable and disable the hud by tiping "hud 0" and "hud 1" (in the console)

0=off 1=on..

it leave the score and credits tho, and i remember there was a file that removed that too.. forgot where, maybe game-maps
