I think they've already proven themselves with the awesome trailers and the other media they released.
Gameplay >>>>>>> graphics.

I actually agree with Gostow here, Renegade X looks awesome and I don't want to put them down but I'm a little worried Renegade X wont have the same "glitches" of reality that renegade has. And be more like CS:S or TF2. For example the "sniper dance" may not be possible because moving in CSS takes a little while to get up to speed.

If I want that sort of behaviour, I will play CSS.
