Hi.

Id like to optimize my renegade gameplay by changing my Aim icon and potentially some other stuff.

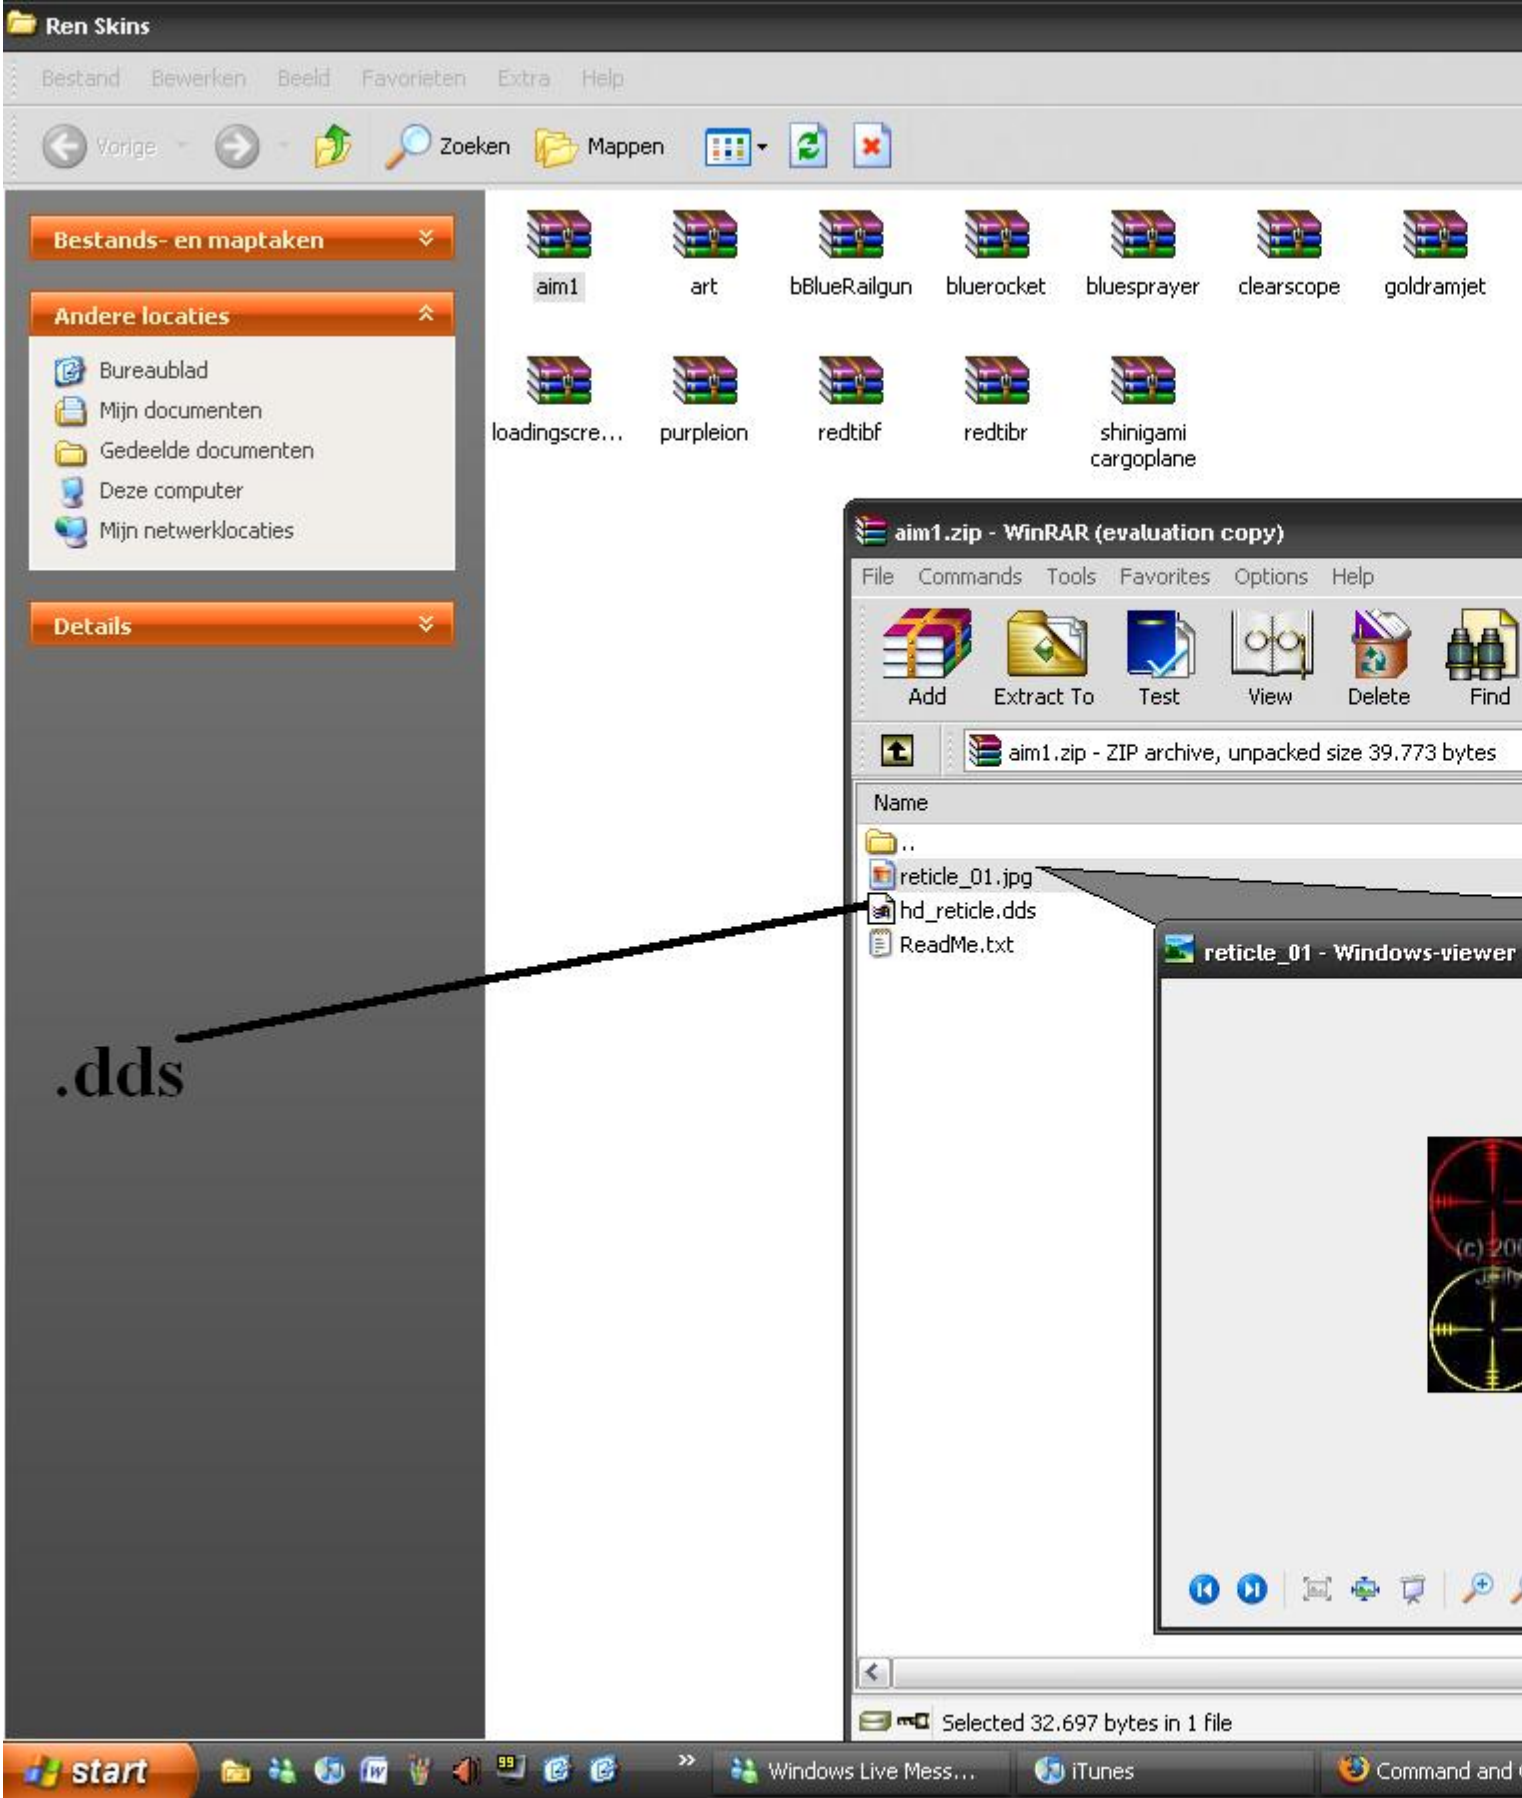

However, I got this Winrar with Renegade Addons and skins from Filefront (see screenshot) but I dont know how I make these files work. There was no explanation with the winrar, only a notepad saying its downloaded from www.jelly-games.net/.

Anyway when I want to download skins from jelly I cant reach the skins or im to stupid, not sure . Any help?

Thanks.
