I was in FOD(Forces Of Diversion) server, as usuall I got havoc and started snipin, and I ended up with 97 Kills in total and it was in Map Under.mix, well here it goes, when the next map started I got kicked out of the game, well i am guessin they kicked me just because I had 97 Kills, cuz I know I got kicked for that, cuz I didnt do anythin in the server against the rules or anythin and I didn't say anythin to the host or any admins that were online, well right after that I signed in with my other name and went back into the server and still got kicked!!
and the host still didnt allow me in!!!
here some screenshots of it!
