FerhagoI have a few questions about making c-130 drop scripts.

1. Is it possible to change the weapon a dropped bot is holding?

2. What is the name of the stealth black hand unit? I just need the name I know how to make him stealth and all.

3. Is it possible to change what a dropped bot drops (after you kill it)?

4. I saw someone make the c-130 fly by without swooping down. It dropped bots. How is this done?

5. What does the little -120 or some other number at the beggining of each line mean? I think it means time interval

6.How do you determine where and how far apart the bots will be when dropped?

Thanks in advance to anyone who can help me

1.yes,i think
2. dunno
3.i think you can with certain scripts
4.i have no idea
5.the time it takes to for the "thing" to "spawn" or the script to apply
6.don`t know if you can
