rrutk wrote on Sat, 21 March 2009 07:38E.g. if I set up a server with my mod, it will not appear in the XWIS-server list for most users, because there is a different cameras.ini in the directory. so renegade handles the mod like a different game version.

for the one who has installed the mod with this ini file, only servers with the same ini-file appear at ones XWIS server list.

this is bad, because nobody knows that such a server is alive.

can this be changed in TT? the way different camera-ini-files dont influence vissibility of servers?

Cameras.ini is a client side tool, so even if you modded it for the server it won't change the game play for any clients, therefore you might as well remove it.
