Minimum System Requirements

- Windows XP SP2 or Windows Vista
- 2.0+ GHZ Single Core Processor
- 512 Mbytes of System RAM
- NVIDIA 6200+ or ATI Radeon 9600+ Video Card
- 8 GB of Free Hard Drive Space

Keep in mind that I run Renegade X with a PC that barely meets these requirements, and if some fancy details are turned off, one could still run the game on medium and low settings with a low-end PC.

but there will be no "renegade x" with medium and low settings...

I am sorry you think so
