ChatHistory is a VERY useful one that was originally introduced in APB, but works in at least 3.x versions of scripts.dll/bhs.dll (I don't remember if it works for 2.9.2 or not). If you have chat logging on (F8 log 1), you can hit the ChatHistory key and it'll bring up everything said up to the point you hit the key (if you want to see anything said afterward, you have to hit Escape and then the ChatHistory key again), and you can control the scroll bar!
