Well here it is...

I would have added a spoiler but, the pictures did not work in them.

Expand the tree as shown and click on "Modify" on that preset there 'CnC\_Beacon\_NukeStrike'

Since I am doing this tutorial for Nod I am using this preset.

However if you would like this for GDI then expand the tree named 'Ion Cannon' and Modify the 'CnC\_IONCannon\_Strike' or something like that.

Untitled - Commando Level Editor

File Edit View Object Vis Pathfinding Lighting Sounds Camera Strings Presets

Now add the script 'TFX\_Replace\_When\_Repaired'

Set the preset name to the item that you want to make (must be the exact name)

The DropHeight depends on the object I would recommend for something like a vehicle to be about 15 and for infantry to be about 8

The Health and Armor percent must be the same #'s as the object you are making.

I am making this to spawn will fill in the correct #'s for

TimeManager::Update: warning, frame 1570 was slow (9475 ms)  
 TimeManager::Update: warning, frame 1651 was slow (6534 ms)  
 TimeManager::Update: warning, frame 1652 was slow (30065 ms)

Ready tutorial

Click Yes and give a min to save don't rush or it will freeze and break and it will be all your fault! :<

10) [10.PNG](#), downloaded 495 times

Now copy the obj  
the  
'C:\Westwood\Re  
directory

Run the game!

I will join team Nod on  
Multiplayer Practiece just to  
show you what you have  
done.
