well no i dont like servs with extreme mods either i enjoy the buy commands and stuff though but i dont like invisablw flying chickens with obby guns... its just insane i mean buying a med for twice its price in the battle feild is fun buy getting spawnkilled by something small , flying, and invisable is not.

but this isnt for a fight server its for my building serv. and i need to be able to tell the server to create it after map load :S
