Listen up Everyone

I have a multiple dedicated server and am intrested in sponsoring a community / clan and giving them a free server. There is only one condition. That community / Clan must be active on our forums / irc. We are doing this to try get more users to our community and to help another community / clan to. We hope that we can find a Clan / community that we can get along with and work together with to make us (Steam-Serv) and the other clan / community bigger and get more users.

What I'm willing/able to offer;

Voice:

We will give your owners Server Admin on our TeamSpeak and you can make what ever channels you wish for your clan / community

Game Server:

Up to 24 Slot Game Server (Depends on game!)

It would be co-sponsored, as in our name & yours would be on there

IRC Channel:

You would have the chance to setup your channel on any network!

Network Info:

All Server are located in UK
full duplex 100Mbit network

Thanks for listening

The Steam-Serv Team.
