While I worked on the Rp2 mod, I also had another little mod I made on the side. Recently I found it again, and decided to finish it and post it here. It's basically a co-op mission where you and some friends can fight through a bunch of different environments and try to reach the end. It's pretty old, but the gameplay's challenging and fun. Give it a try.

Notes: You need to be running the RP2 modified scripts 3.4.4 to play this, download them at the RP2 site.They are inclided with the map.

The level models aren't very good at the beginning, remember: it's a few years old.

Pictures

Also, don't ask why it's called "metroid_level" and uses Halo models for players.
