HEllo ppl,
I´m new here in this forum or lets say new in writing here.

So my question is how exactly i can create a hud with paint shop pro and hud ini, what i have to
do?
I know about the BHS.DLL readme. but it isnt a discription how i can edit the images from the Hud
(GPS Hud) and how i can find out what size the things have, i mean how to configurate the exact
potions, i know in the hud ini but maybe it gives a little programm to see the hud complete.
I hope you know what i mean and thanks for helping me.
