I hardly ever see anyone on Jelly on Teamspeak, so if you're using that then perhaps Exodus or TK2 (on Euro evenings, like 8PM GMT and onwards) is a better choice.

Pretty sure those server owners should have banned him. Especially on tk2, would you really like a cheater playing on your communities server? I think not.

Oh, ok. lol.

I thought Crimson's reply was about exodus server, not the OP.

But yeah, wouldn't like him on our server then.
