Subject: Re: list bugs in LE here
Posted by jonwil on Thu, 01 Oct 2009 04:13:45 GMT

Glitched buttons, those I have seen before myself. Fixing them is going to be annoying though
Themes issue, that one I havent experienced here (since I have turned themes off completly)
Crashes are definatly on the list to fix.

The old "Leveledit fix" does solve the armor.ini and dazzle.ini
problems.

Scripts on ammo is not going to happen.
Don't know how Jerad Grey is doing weapon animations so I dont know if thats something we will
be doing.

Will look at all the other issues and see if I can reproduce and/or fix them.

No, I wont be doing an armor.ini editor
