I don't normally waste my time in these threads but I will say this

A000 names - done to death, nothing will change and there no way that TT should ever have power over them, also with the TT patch being forced (for XWIS users), A00 nicks won't matter since the current scripts (3.4.4) already list servers by count not names.

Points 'fix' - Sure, make it mandatory, it will take what? a few hours to bypass it with scripts.dll

Sorry to rip your nice long post apart with a few simple facts

Hex.

**excuse the edits - just home from night shift and its time for bed!
