Tildeth wrote on Tue, 06 October 2009 15:14 Referring to your so called "hypothetical", the fact of the matter is that Renegade was DESIGNED flawed and people have gotten used to that flaw. You can't make an idiotic statement like "WHAT IF IT WASNT FLAWED, AND NOW YOU WANTED TO IMPLEMENT THAT FLAW, HOW STOOOOPID WOULD U LOOK??!". Why? I'm confident you can find it in you to find out that answer.

So no game should ever be patched ever, since any flaw that happens to slip by the designers is already into the game and people have gotten used to it anyway?
