So, if anyone doesnt know, Battlefield 2 has a mod for is self called Sandbox. I played it and loved it. Do you guys think that it will be a good idea to make a sandbox mod for renegade? Since there are alot of "laggy" build server on renegade, why dont we have a client side one, with less lagg.

Want to see if the community thinks its a "good" idea, i'm sure its not so great but it will be fun...
