explain how you got to this based on what i said

Quote:With the map transfer stuff, fanmaps would be ALOT more popular anyway (atleast more than they are now), so yeah, it wouldn't just be 1% of the ren community, lol.

i'm against using any and all mods or fanmaps because i think this one just so happens to be stupid...ok!1!!111

i personally can't wait for the automap downloader because mappack servers will be amazing with a decent number of players ingame
