So this is what I have.

## File Attachments

The image displays two instances of the Cygnus FREE EDITION hex editor. The top window, titled "Cygnus FREE EDITION - [c\_ag\_havocd...]", shows a hex dump of a file header. The bottom window, titled "Cygnus FREE EDITION - [c\_ag\_gdi\_locke]", shows a hex dump of a file header. Both windows display the first 16 bytes of the file, including the file signature, version, and header information.
