Subject: How do I restore renegade to original settings

I want to restore renegade back to original with out any patches or any updates or anything just like it was just freshly installed so I can back up my files. I lost my disc and I keep screwing it up when I try and down load skins. I'm just trying to add a new feel and look to my game and am having a little trouble doing so and can't really afford to buy a new one right now. Any help would be great, thank you.
