Rene-Buddy
(Renegade Buddy)

Development On hold till the WOL Protocol stop changing. (probably after the release of scripts 4.0)

A XWIS instant messenger for C&C Renegade developed by halo2pac.

Allows you to talk to Renegade players and maintain a list of buddies without the need for the game its self.

A few features added with this program include and are not limited to:

- Smooth streamline user interaction.
- Enhanced buddy tracking.
- Buddy list size enlargement.
- Enhanced stats for the server your buddy is playing in. (Coming soon)
- Buddy status alerts. (logoff, logon, join)
- Nickname registering/deleting. (coming soon)
- Easier user blocking.
- Server Listings.
- Password Resetting
- Join buddy in game from Rene-Buddy. (coming soon)

Snazy2000

DeathC200

You were a great help!

Download:

<http://www.halo2pac.co.nr/renebuddy/download/>

Clarification:

Any user logged in with Rene-Buddy will appear as an idle Renegade Player in the Xwis-Renegade lobby.

Also Rene-Buddy has been approved by Dave Anderson from DCOM Productions
Dave Anderson wrote on Wed, 28 October 2009 10:42 This program is safe. I have personally went through each source file and checked the source for malicious code. There is none. If you don't feel you trust this program, there's no hard feelings; just don't use it. However, if you like the features it has to provide, then that's great too.

Thanks Dave <3

And

Dante

Dante wrote on Sat, 03 April 2010 17:05 Just went through the code myself, looks safe.

(Thanks for the sticky Gozy <3)
