Did one of the scripts remove 1st person from Renegade, or did you people just forget about it?  
You don't snipe in 3rd person in Renegade unless you're an idiot.

Sniping in Renegade is something only a handful of people ever did properly, and were good at it at the same time. I'm talking about people that refused to use ramjets, changed positions frequently, and preferred playing outside of the tunnels. Most people just used sniper rifles like they were shotguns, that's not sniping.
