Subject: My modem keep dropping people!

Whenever I host a game it seems that my modem will randomly disconnect everyone on my game. I dont understand it. Why does it do this.

I then noticed a pattern when I kicked someone. My game crashed when he was kicked. I did this again and my game crashed again when he was kicked. I thought that people leaveing my game crashed it and all evidence pointed toward it until someone left my game without it crashing.

What the hell?

What is going on?

Whenever my game crashed I had to restart renegade in order to get back on WOL.
