I launched a new clanwar server today.

IRC Server : Irc.MatrixRen.com
Wol Hostname : A0000000S
Server Name : ~~The MatriX Sniper ClanWars~~
Player Limit : 20
IP : 208.43.20.124
Port : 1111
Password : clanwar

Now i only need some clans who want to play in it.

The owner of the clan automaticly gets Full Mod at this server.
He can pick 2 other members who will earn Half mod.
All the other members will earn Full Temp Mod.

Requirements :

A clan with 3 members or more.
A clan website.
An owner who knows how IRC works. (we can help you with that)
All Members need to use script version 3.4.4. (All users without those scripts will be automaticly kicked from the server)

For more info and to registrate your clan use the following link :
