General HavocNow only if there was a program called n00bguard...

rofl.... now that thing would be firing off like nobodys business

Crimson has a page ready for RenGuard though I belive.

Hope it's not to far away.

Edit:

CrimsonIt will be <http://www.renguard.com> but I'm still waiting for DNS to propagate and the site just says "renguard.com" right now.
