Almost all the latest drivers, there is a few that I can't find.

I am using drivermax there is a couple of drivers that has a new version of the drivers.

But using drivermax I can only update 2 per day... I have tried to manually find the remaining updated drivers from google but not having any luck.

I am not sure if you are able to see this page

 http://www.drivermax.com/driver/drivers.php?computer_id=667J415240VIKXOK5I7890TM TDXVKB&iduser=1513612

The green tick is the latest drivers and the red X needs to be updated, I am trying to update the intel 2448 driver and audio device.
