Oh wow, thanks a lot!

Not to be ungrateful, but is there a possibility you could explain what would need to be changed to get scripts 3.4.4 to work on '10? The reason I ask is because I'm trying to work on SSGM, and that's just vanilla scripts. However if it was a lot of changes or you don't feel like explaining it I completely understand.

Thanks for the help!

EDIT: Compiled it and it worked perfectly, not a single warning or error. Extremely appreciated sir!
