Erninnjo wrote on Thu, 08 July 2010 06:30Hi all.
How can I create a working LAN server during hamachi?
i've tried it but the others couldn't join the game. They clicked the join button but nothing happened.
Please help me!
Well, if I recall, Renegade's LAN support was never fully completed and is therefore buggy as hell even on a standard LAN. I'm fairly sure it won't even work on Hamachi, but something also tells me there was somebody that used to run a Hamachi server for Renegade a while back... hell if I know.
