Subject: LE help please
Posted by CdCyBoRg on Sun, 29 Aug 2010 06:27:39 GMT

Hey i just installed level edit on Xp running the final decade.

I changed my registry and the presets now appear, i created a folder in my mod package folder called scripts and put my scripts in there because i think thats what i am meant to do but no scripts appear when i goto mod a object on Le, Any idea why? Thanks in advance.
