Anon wrote on Fri, 08 October 2010 09:10I recommend you start using capital letters at the beginning of a new sentence, proper punctuation etc.

I also paid a visit to your website and I can tell you beforehand that you are not going to find a good host using the forums on your website. Besides that a host wants to know for sure if your idea has any potential/future at all. Else it would just be a waste of time and effort. Consider renting a server at http://www.mp-servers.com. As far as I know they're rather cheap.

Don't expect someone to offer you a server for free as they cost a lot of money and the chance of getting a sponsored server is not that big. Especially since you haven't built-up a reputation yet.

I think it would be best if you thought this idea over some more before you start wasting your time on something that might not have any future at all.

I'm not trying to annoy you and I'm not trying to make an idiot out of you. It's just some advice.

I know this has no future.
I know that servers cost allot of money.
I'm not starting this to get shot down and just give up.
If i don't try to make something ill lever get any reputation.
And instead of just trying to get me down try to say something useful which i don't already know
.....
