Hitman...just a word of advice so when you upload the video after your editing....drag the audio box (where your song is) and drag the end of it to the last clip so you don't have the extra time to wait and upload from your computer and then to youtube.

Decent sniping the streaks were good.

<http://www.youtube.com/watch?v=npWhHQpdD1Y&list=ULHfsbxgQSa2Y&playnext=2> you don't have to watch it just notice how the songs fade out it's a nice touch.

P.S. Hate...you have to do

File

Save Movie File as

To Computer

Recommended Settings

and it will proceed to compress it for you you'll know when you got it right when theres a checkbox saying "Play Movie File when finished"

and from that link you used....Download something called WeGame, it's way better than fraps (doesn't drop your fps) and it's totally free that way you won't have that ugly watermark smack dab in the middle of your screen. You don't need any other converter but if you want Sony Vegas Pro 9.0 than Kicsi can hook you up lol
