Is there away to put something on the map or have something in a bot to catch or disable rgh., forcing the user that has rgh. to not use it or get kicked out of the server?

I tried making a simple 1x1x1 box and putting it in a map so the *cheat name removed*player would lock onto the box and not the player that is by it or away from it forcing him or her to not use rgh.

I'm trying to find a easy fix to disable it so they have no choice but to leave the server or use there own fucking skills that they don't have.

P.S.

We have to come up with away to stop this, like punkbuster stops there cheats.

I know we can find a fix for this, there is no way 1 man can make a cheat that 100+ can't counteract it.
