HaTe wrote on Thu, 03 March 2011 22:09 There's more proof (imo) supporting evolution. Well, two things. First, factual proof can't be in the form of an opinion. Secondly, no, there is no proof to support evolution. That's why it's called the "Theory of Evolution."

However, various scientific evidence does infer that the theory of evolution is highly plausible. It's just not factually proven so.

Also, funny comic strip.
