ok, so 1 day i was playing a game on renegade, i was engi and some n00b put a mine right infront of my repair gun. then when i tried to reapir things , the beam ray of the gun deflected of the mine and it repaired me!!!!!!!. sometimes you have to look up and down, right and left to get it to work.

i am anable to include a screenshot. but i will soon.

but i want u guys to try it!!!!!
