Quote:i ppl there is any way to run TT among whit models replacement? i know that my opinion is not relevant but if i cant use them, i am afraid i will keep using 3.44, so hope this wont be forsed upon players or most probably i will stop playing ren Sad, i know some models can give you advantages over otters, but that kind of stuf are easy detected actually i belive, though i have no problem whit the disabled BB, but i am sure i am not the onlyone that loves to customize his ren, and prevent player of use some of his weapons/chars models can probably harm the game instead of impruve it, but again it is just my silly opinion.

this are my reasons, the only problem for me is that i cant use my models replacemsnt whit TT, and i hate orinal ren grapics lol, hope this can be fixed, though i have no problem whit the buildings bars disabled thing.
