cAmpa, try hitting "build" again. I get that same error sometimes and hitting "build" a second time always makes it work.

kamuixmod, how did you install scripts 4.0? Also kamuixmod, if you have MSN/AIM/ICQ/Yahoo/IRC, talk to me (my details are in my profile)

sycar, can you zip up the crashdump plus the scripts.dll and scripts.pdb files that were created by visual C++ and upload them somewhere, I will use that information to help analyze your problem. Also sycar, if you have MSN/AIM/ICQ/Yahoo/IRC, talk to me (my details are in my profile)
