RR does not work with 4.0.

rr launcher was just a list of server's broadcasting to gamespy. You can still use it.

Use Renlist instead   http://www.renegadeforums.com/index.php?t=msg&th=38221&start=0&rid=21615

Theres only like 20 launcher utility for renegade TT didn't need to make another one.

You can still use any skins or modifications you want but 4.0 servers using the anticheat approve only certain files ( depending on server owner).
