I stand corrected; it was actually deleted on my laptop, thus its Symantec Endpoint Protection's Proactive Threat Protection that deleted Game.exe.

As you can see it marked it as a Bloodhound.Sonar.9.

The screenshot shows the Symantec Endpoint Protection interface. At the top, it says "View Logs - Symantec Endpoint Protection". Below that, a banner says "Scheduled Active Scan in progress...". The main area is titled "View Logs" and contains a message: "The logs you can view are listed below." To the left, a sidebar has links: "Status", "Scan for Threats", "Change Settings", and "View Quarantine". The "Scan for Threats" link is currently selected. On the right, there's a section titled "Proactive Threat Protection Logs" with tabs for "System Log" and "Threat Log". The "Threat Log" tab is selected. It shows a table with one row:

Filename	Risk
game.exe	Bloodhound.
