The mod is called : Pistol Wars
The model was made by adavanze (AKA Typhoon or DrkFlow)
It uses objects.ddb but not the original PKG ones,so you can play it on every-map
I am planning to give this UN APC have an weak mg
The mod is released already,you can download it on the forums on my siggy (Its in the uploads section) and it don't have the UN APC on this version,and you need to register to download it (The key that is sent by mail is slooooooooooooooooooooooooow) lol
