I'd bet I am the best in an Air vehicle,, as of today I single handedly without our hand of Nod took out 2 Orca's + 2 PIC and 2 havoc on Flaying fuck without repair ..... yes that level... THAT, as well as shooting down 3 Orca's with a light tank... come on now...

And if I snipe, I won't be flickering around like some dancing queen... I'll be hidden... and when I actually shoot... real sniper action in game... All I can say is... Play battle field 3 with me some time... When the balance patch for that game is out... all aircraft have to fight off objective... add me battlelog, same nickname...

As for Renegade, best planner, distraction and sniper if you need one... only need to rely on the rest of my team for co-ordination... Back on topic, I am great... most would agree...
